

# Things Your Baby

## Hopes You Know About Marijuana

- Marijuana crosses the placenta, and is found in the newborn's body after a single use.
- Children of mothers who smoke marijuana are more likely to have social, learning and behavior problems that continue throughout their lives.
- Smoking marijuana causes less oxygen and food to get to the baby. This decreases your baby's growth and development.

*"But it is natural and it helps with my nausea"*

**FACT:** Just because marijuana is a natural herb, doesn't make it safe for your baby.

**No Amount  
of Marijuana is Safe**

**to Use During Pregnancy  
or Breastfeeding**

For help in quitting  
smoking marijuana, call
